IL LITORALE

Concetto architettonico

Non potendo intervenire sulla struttura, stanze e corridoi, abbiamo dovuto immaginare un sistema modulare diffuso che ci permetta di modificare la percezione dello spazio, creare legami, nuove forme, **sensò di appartenenza**, introducendo nuovi punti di vista e prospettive.

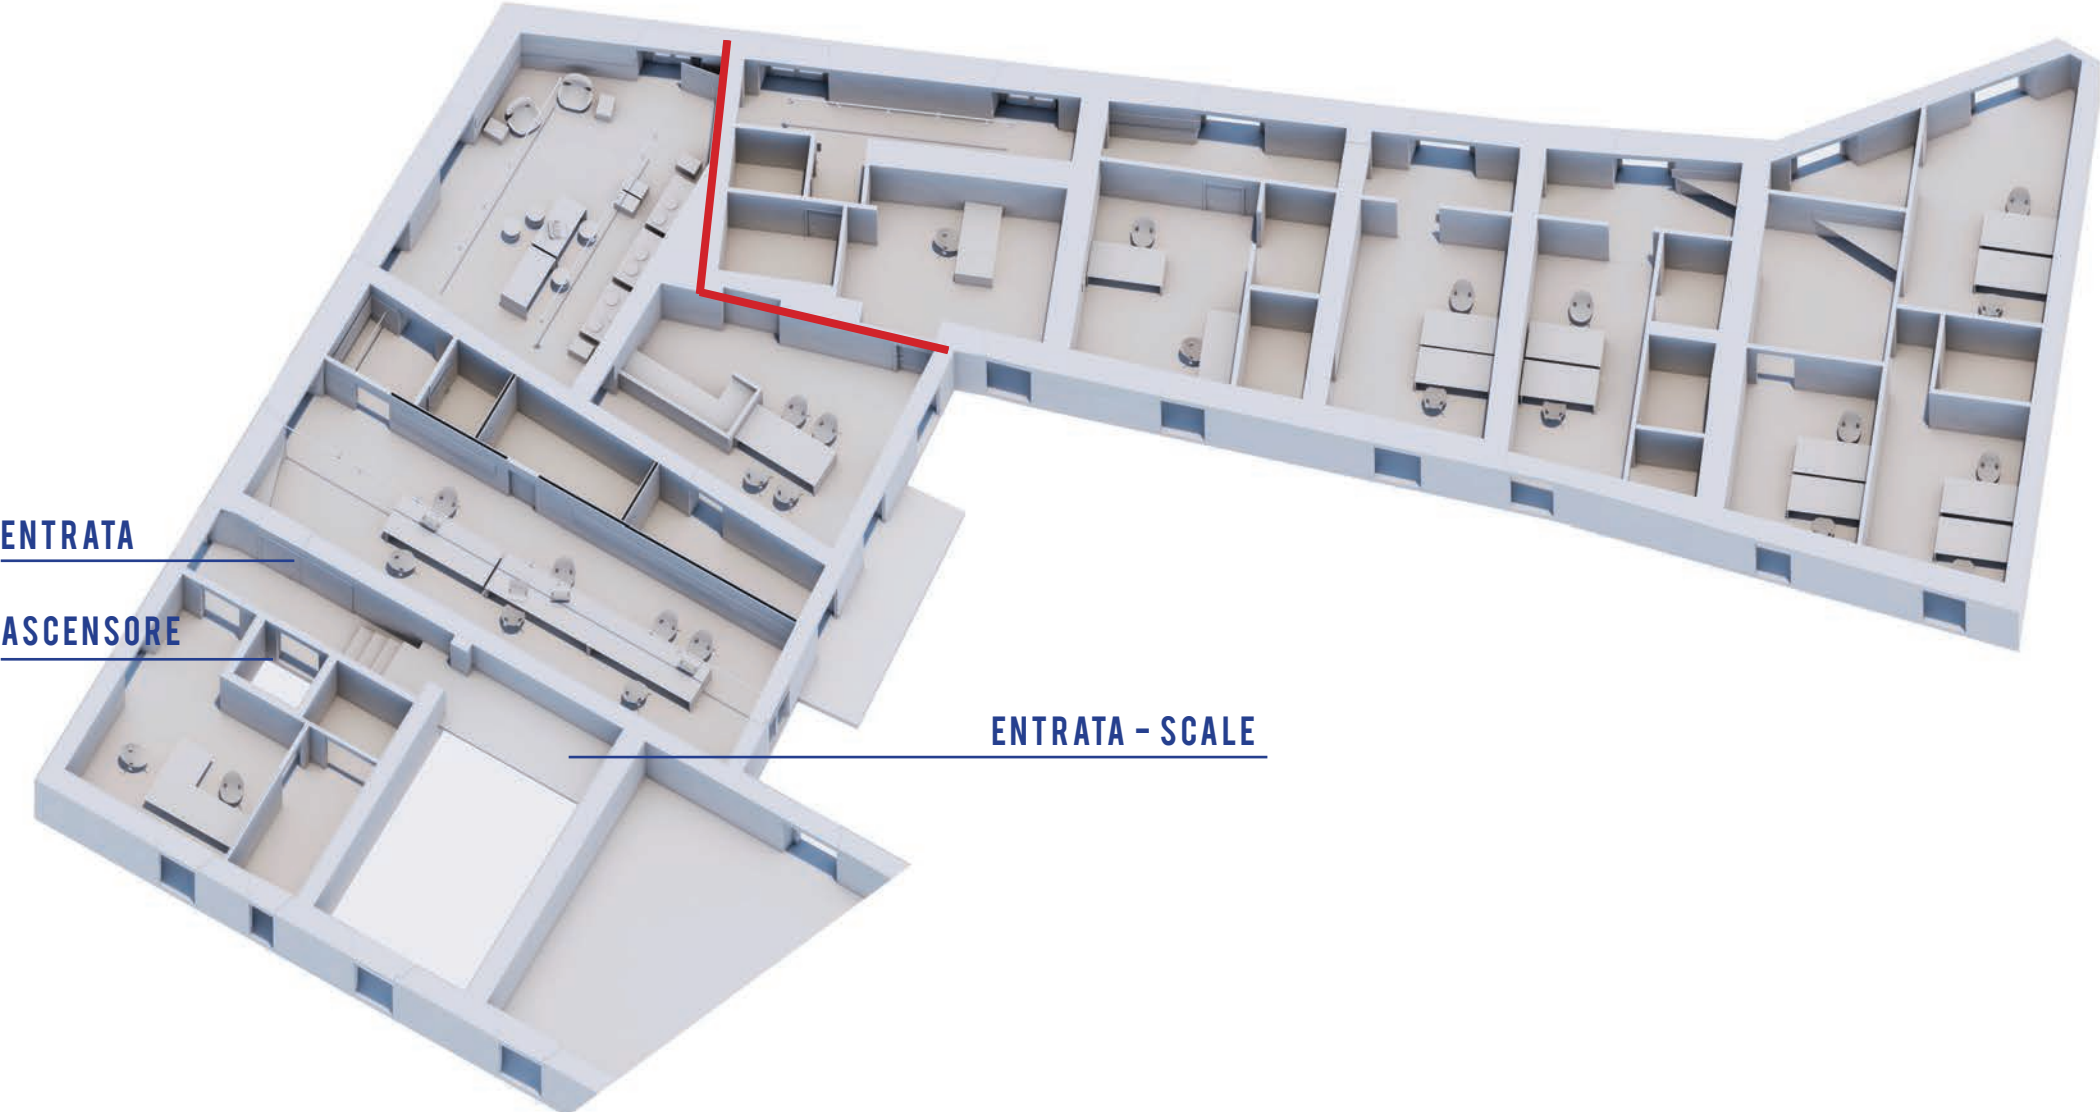

Come?

Con l'utilizzo di pareti colorate, rivestimenti, arredi e costruzioni semplici abbinati allo studio di **forme geometriche e armonie cromatiche**.

Questo per creare **continuità spaziale** tra le varie aree di attività, di lavoro e di studio.
